Christiaan Günter Alwyn Viviers

Electrical & Electronic Engineer

About me I am a recently graduated technology enthusiast. My passion for technology is especially owed to the recent developments in machine learning, AI and biotech. Born and raised in South Africa, I have learnt how to make-do with the limited resources at hand. I have a never-ending desire to learn new things. I believe in the value of an open-minded perspective and know that learning new things can be through engaging with new cultures, especially through traveling. Aside from investing the majority of my time in further self-development, I enjoy socialising and meeting new people.

Education

2016 - 2017, Stellenbosch University

Masters Degree (MEng.) Electrical & Electronic Engineering. Cum Laude. Biotechnology Specialization.

2016 - 2018, Online Short Courses

Machine Learning at Coursera, Deep Learning at Udacity, Full Stack Web Development, in progress, at Udacity.

2012 - 2015, Stellenbosch University

Bachelor Degree (BEng.) Electrical & Electronic Engineering. Informatics Specialization.

Experience

July 2016 - November 2016, Student Assistant

Student Assistant at Stellenbosch University for C programming module.

January 2016 - March 2016, Researcher

Research and Development of Biosensor and microfluidics at SAND microfluidic laboratory, Stellenbosch University.

Skills & Competences

Platforms

- Blender
- Eagle
- AutoCAD

Software

- Python
- HTML & CSS
- MatLab
- C
- mySQL
- Git Version Control
- Java
- JavaScript

Other

- Hardware Design
- Rapid Development
- Goal Orientated
- Antibody Work
- Critical Thinking
- Team Work
